## MAPRO S.p.A. Announces Agreement with Upstate Compressor Services to Address Biogas Market in North America

### Significant Developments Include USA-Based Service Center, USA-Based Rebuild Parts Stocking, and On-Site Commissioning

For the past two years, UCS and MAPRO have collaborated closely to enhance support for US and Canadian OEMs, integrators and end users of MAPRO blower and compressor products. This partnership has allowed both companies to gain deeper insights into the evolving needs of the North American biogas market.

In recognition of these efforts, MAPRO has awarded UCS an exclusive service agreement for the biogas market.

As part of this expanded partnership, both companies have committed significant investments in parts inventory, a dedicated service center location, and specialized tooling to ensure that MAPRO's customers have access to reliable operating equipment and swift support from factory-authorized technicians.

"We are excited to expand our partnership with MAPRO and offer their customers enhanced US-based service support and parts inventory," said **Craig Jackson**, CEO of Upstate Compressor Services. "This strategic initiative underscores our ongoing commitment to delivering value to our biogas stakeholders."

### About MAPRO S.p.A.

Since 1959, MAPRO S.p.A. has been designing, manufacturing, and exporting machines that treat air and technical gases globally.

The company initially focused on rotary vane compressors and vacuum pumps for handling gaseous fluids, including corrosive substances. MAPRO's technology is used across diverse industries, from food processing to pharmaceuticals, molding, packaging, environmental control, and more.

Today, the company continues to provide reliable, technologically advanced solutions for air and gas conveying processes.

### About Upstate Compressor Services

Founded in 2018, **Upstate Compressor Services** (UCS) specializes in providing parts, lubricants, and maintenance services to users and producers in the **Compressed Natural Gas (CNG)** and **Renewable Natural Gas (RNG)** markets. UCS is also a master distributor of **Summit Lubrication**, offering premium lubricants for CNG and RNG compression equipment.
